

“TEACHING GEOGRAPHY BEYOND THE TEXTBOOK: A GIS HANDS-ON EXPERIENCE”

A Certificate Course for A/L Geography Teachers in Sri Lanka

This one-day hands-on GIS training workshop will equip A/L Geography teachers with the skills and tools to bring maps, data, and spatial thinking alive in the classroom. Moving beyond traditional textbooks, participants will explore practical GIS applications that make geography more interactive, relevant, and exciting for students.

Course Content:

- Introduction to GIS and Its Role in Geography Teaching
- Introduction to free/open-source GIS software
- Understanding sources and data layers
- Creating a Simple Risk Map (e.g., Flood-Prone Areas/ Landslide Risk Areas)
- Basic GIS functions
