

## Extension Course in English: English for Professionals

Department of English

University of Peradeniya

Plans are underway to conduct the Extension Course in English (a certificate course in English conducted by the Department of English for outsiders) **in the online mode** this time. The planned power outages have prevented us from finalizing the timeframe for the call for applications, the selection/placement test, and the commencement of the course. The course will be advertised within the next few weeks, as soon as we have the assurance that the course can be conducted without the power outages being too much of an obstacle. The calling for and receiving of applications will be done in the online mode via the Arts Faculty website.
